

YAZAN ALAAM ALFANNEY

Software Engineer | Computer Science Graduate

Amman, Jordan | +962 795 988 749 | yazanalaam@yahoo.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Princess Sumaya University for Technology

Amman, Jordan

B.Sc. in Computer Science (ABET Accredited) | GPA: 92% | **Ranked 3rd in Computer Science batch**

EXPERIENCE

Software Engineer Intern | [ETIP](#)

May 2026 – Present

- Develop backend microservices in Kotlin and Spring Boot, delivering 8+ REST API endpoints following layered architecture patterns.
- Build cross-platform features using Kotlin Multiplatform, bridging backend and frontend logic across Android and desktop targets.

Software Development Engineer Intern | [Inspire for IT Solutions](#)

2025

- Contributed to a production banking web platform using Node.js, Express.js, React, Tailwind CSS, and MySQL serving 500+ users.
- Built 10+ backend APIs, reusable frontend components, and normalized database schemas while following Git-based team workflows.

Teaching Assistant | [Princess Sumaya University for Technology](#)

2024 – 2026

- Selected as TA for Data Structures & Algorithms and Design and Analysis of Algorithms out of the top Computer Science students.
- Led weekly review sessions for 20+ students, reduced student debugging time by ~40%, and reinforced core algorithmic problem-solving.

TECHNICAL SKILLS

Languages: C#, C++, JavaScript, Kotlin, SQL, PHP, Dart, HTML, CSS

Frameworks & Libraries: ASP.NET Core, Spring Boot, Node.js, Express.js, React, Flutter, Tailwind CSS

Databases & Tools: Oracle, MySQL, Firebase, Git, GitHub, Linux, REST APIs

Core Areas: Backend Development, Full-Stack, Data Structures, Algorithms, API Integration, OOP

PROJECTS

Smart Scheduling System *ASP.NET Core · C# · Entity Framework Core · Oracle · Gemini API*

- Built an AI-assisted academic scheduling system that auto-generates valid schedules for 50+ courses, detects conflicts, and surfaces recommendations via Gemini API — reducing manual scheduling effort by ~70%.

CopsBoot *Kotlin · Spring Boot · JPA · H2 · Android*

- Developed a full police reporting system with Spring Boot REST backend, JWT authentication, and Android client integration; handled 5+ entity relationships with clean repository-service architecture.

AlJazira Bank Website *Node.js · Express.js · React · MySQL*

- Delivered a banking catalog web app with 15+ service pages, full backend API layer, and relational database — completed as a team intern deliverable in under 8 weeks.

COMPETITIVE PROGRAMMING

- ICPC JCPC 2024: 31st place | ICPC AmmanCPC 2025: 20th place | ICPC JCPC 2025 participant
- IEEE Xtreme 18.0: Top 20% worldwide | IEEE Epicode Contest: Top 8 | PSUT ACM Marathon: Top 10 & Top 20
- Solved 300+ problems on [Codeforces](#); active ACM club training and university contests.

CONTENT CREATION & LEADERSHIP

- Created 95 educational videos on NoNerds YouTube channel covering Data Structures, Algorithms, and Statistical Methods — reaching 1,000+ views across the series.
- Volunteered in university coding marathon logistics; represented PSUT during Queen Rania's university visit.
